## AIO-1.2临时启用行人避让 SOP

AIO-1.2hotfix中,经过产品需求确认,关闭S线所有场景下的行人避让,保证机器人的运行流畅;如果要临时开启,修改如下参数

- 1./launch/param/pnc/decision.yaml中improve\_pedestrian\_interaction\_experience 从false改为true
- 2./launch/param/pnc/gaussian.yaml中close plan mask limit从true改为false
- 3./launch/param/pnc/planning.yaml中use\_decider从false改为true 修改完参数之后,重启生效

对于M线,只有超市-大方砖和超市-小方砖场景才开启行人避让,其他场景均关闭了行人避让功能,要想开启,需要在app配置以下三个高级参数:

- 1. /pnc/planning/moving people decider/use decider 从false改为true
- 2. /pnc/gaussian/strategy/close\_plan\_mask\_limit 从true改为false
- 3. /pnc/decision/realtime autocover/improve pedestrian interaction experienc
- e 从false改为true
